

How to Invite Visitors With Invitation Pop-Ups?

An **Invitation Pop-up** is an automatic chat invite sent by you to your website visitors. You can set them to trigger after a specified period of time, for example, 10 seconds, and encourage your website visitors to chat.

Here's how you can enable the Invitation Pop-up:

Step 1: On your ProProfs Live Chat dashboard, go to **Settings >> Advanced >> Invitation Pop-up**.

Here, you can configure:

- **Automatic Invitation:** Enable this feature.
- **Time Delay:** Set the time after which the invitation will pop-up.
- **Invitation Style:** Choose how you want your invite to appear to the website visitor, like a **Chat Window** or **Invitation Pop-up**. In case you select Invitation Pop-up, you can further customize the invitation text message.
- **Invitation Close Time:** Set the time after which the invitation will close itself.

Save when you're done with the Invitation Pop-up settings.
