## What is GDPR?

The General Data Protection Regulation (GDPR) aims to ensure that corporations inside or outside the European Union become more transparent about how they collect, handle, and process personal data of European Citizens. The primary goal of GDPR compliance is to eliminate security gaps when it comes to collecting data from the users and allow total data control back to the users. The GDPR laws vary depending upon your location and the role you play with respect to the EU citizens. Find out more specific information on GDPR on [Wikipedia](#). With GDPR in effect, most organizations that collect, maintain, or process EU residents' personal data (regardless of the organization's global location) are required to implement specific procedures and safeguards for that data. We at ProProfs have made GDPR compliance a priority and are working to ensure we reach the required levels of transparency and compliance.
