

# How to Create a Push URL

A **Push URL** is a link that you may share with a visitor or customer through the Operator Chat Window. These Push URLs can be, for example, a link to a useful article, a link to an important webpage such as a pricing page, etc.

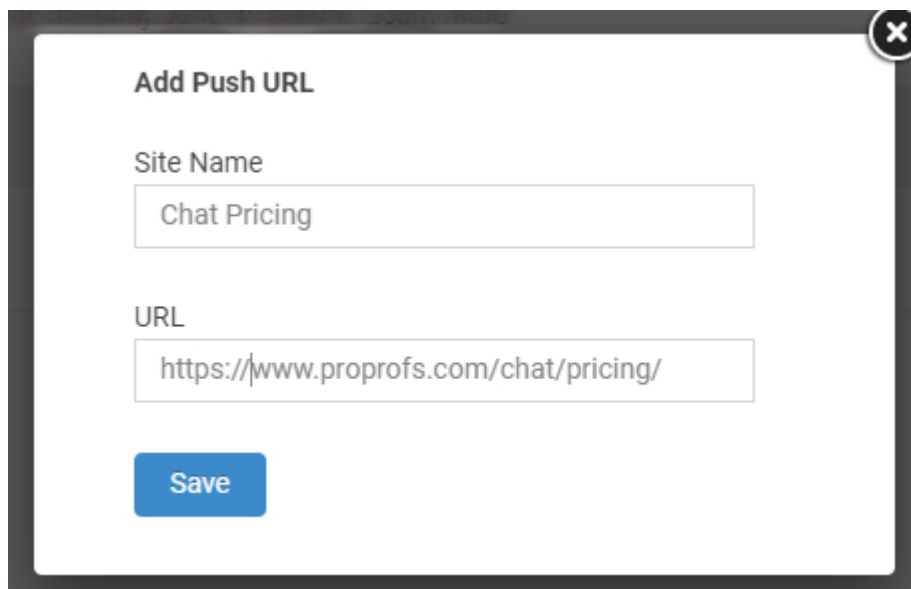

You can save these essential or frequently requested URLs as Push URLs and share with your website visitors and customers with just a click during a chat.

Here's how you can add a Push URL in Chat:

**Step 1:** On your ProProfs Live Chat dashboard, go to **Settings >> Advanced >> Push URLs** and click **Add New**.

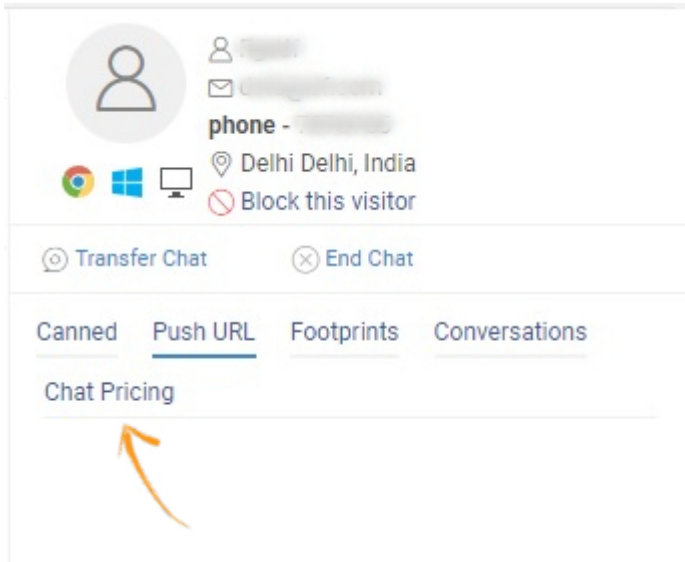

**Step 2:** Enter the **site name**, its **URL**, and **save**. Your Push URL is now ready to be shared.

**Step 3:** Once you've added a Push URL, you can **edit** or **delete** it by clicking the required icon under the **Action** column.

Name	URL	Action
<input type="checkbox"/> Chat Pricing	https://www.proprofs.com/chat/pricing/	   

**Step 4:** Go to the Operator Chat Window and you'll find the new URL under the **Push URL** tab. Simply click the URL name to share it during a chat.
